MF-CT - WOODSTAR MG

Trailers from the Woodstar MG line are manufactured using the highest-quality materials and components. From Swedish Strenx steel to forestry cranes from neighboring Finland—where handling the heaviest loads is part of everyday life. Deep along forest roads, fully loaded, in cold, sun, and rain. Built for true off-road challenges. Whether configured as a tandem, two-axle, or three-axle version, with twin or single wheels, the core guiding principle of Woodstar MG trailers is durability and cost efficiency for the user.

WITH OR WITHOUT PLATFORM

TECHNICAL GROSS WEIGHT

18.000 - 27.000kg

LIGHT OR HD VERSION
